this textbook is a complete self sufficient self study tutorial type source of mathematical problems it serves as a primary source for practicing and developing mathematical skills and techniques that will be essential in future studies and engineering practice rigor and mathematical formalism is drastically reduced while the main focus is on developing practical skills and techniques for solving mathematical problems given in forms typically found in engineering and science these practical techniques cover the subjects of algebra complex algebra linear algebra and calculus of single and multiple argument functions in addition the second part of the book covers problems on convolution and fourier integrals sums of typical functions used in signal processing offers a large collection of progressively more sophisticated mathematical problems on main mathematical topics required for engineers scientists provides at the beginning of each topic a brief review of definitions and formulas that are about to be used and practiced in the following problems includes tutorial style complete solutions to all problems

this book contains an access code in the starting for accessing the 7 online tests new pattern ibps bank po exam 20 practice sets provides 20 practice sets 5 for preliminary exam tests 10 in the book and 5 as online tests 15 for main objective exam tests 10 in the book and 5 as online tests designed exactly on the pattern suggested in the latest ibps bank po notification the solution to each type of test is provided at the end of the book this book will help the students in developing the required speed and strike rate which will increase their final score in the exam features of the online tests 1 the student gets to know his result

immediately after the test is submitted 2 section wise test wise reports are generated for the candidate 3 performance report across the 5 test also gets generated as the student appears in the 5 tests
