united states tax court reports containing case abstracts and opinions of the court regarding cases between july 1 2013 december 31 2013 cases in each volume are listed in the prefatory table the united states tax court is a federal trial court of record established by congress under article i of the u s constitution section 8 providing in part that congress has the power to constitute tribunals inferior to the supreme court the tax court specializes in adjudicating disputes over federal income tax generally prior to the time at which formal tax assessments are made by the internal revenue service though taxpayers may choose to litigate tax matters in a variety of legal settings outside of bankruptcy the tax court is the only forum in which taxpayers may do so without having first paid the disputed tax in full parties who contest the imposition of a tax may also bring an action in any united states district court or in the united states court of federal claims however these venues require that the tax be paid first and that the party then file a lawsuit to recover the contested amount paid the full payment rule contents 8 findings of fact 8 background 8 john provisions of these policies they oppose the bills themselves how can this be why does the american public so often reject policies that seem to offer them exactly what they want by the time a bill is pushed through congress or ultimately defeated we ve often been exposed to weeks months even years of media coverage that underscores the unpopular process of policymaking and mary layton atkinson argues that this leads us to reject the bill itself contrary to many americans understandings of the policymaking process the best answer to a complex problem is rarely self evident and politicians must weigh many potential options each with merits and drawbacks as the public awaits a resolution the news media tend to focus not on the substance of the debate but on descriptions of partisan combat this coverage leads the public to believe everyone in washington has lost sight of the problem altogether and is merely pursuing policies designed for individual political gain politicians in turn exacerbate the problem when they focus their objections to proposed policies on the lawmaking process claiming for example that a bill is being pushed through congress with maneuvers designed to limit minority party input these negative portrayals become linked in many people s minds with the policy itself leading to backlash against bills that may otherwise be seen as widely beneficial atkinson argues that journalists and educators can make changes to help inoculate americans against the idea that debate always signifies dysfunction in the government journalists should strive to better connect information about policy provisions to the problems they are designed to ameliorate educators should stress that although debate sometimes serves political interests it also offers citizens a window onto the lawmaking process that can help them evaluate the work their government is doing genuine since march 2004 is 120 pages notebook for people who celebrates their birthday in finish money greases the wheels of american politics from the local level to the white house in the 2004 presidential campaign president george w bush alone raised nearly 400 million in private and public funds nearly twenty times the combined total raised by john kennedy and richard nixon in 1960 to defeat challenger john f kerry further fueling anxiety over the power of money to dictate political results melvin urofsky one of our nation s most respected legal historians takes a fresh look at efforts to rein in campaign spending and counter efforts in the courts to preserve the status quo he offers a thoughtful and balanced overview of campaign finance reform and the legal responses to it from the progressive era through the supreme court s landmark ruling in mcconnell v fec 2003 and its impact on the 2004 election urofsky focuses especially on the 1971 federal election campaign act and 2002 mccain feingold or bipartisan campaign reform act bcra and on challenges to both in the supreme court in buckley v valeo 1976 the court upheld contribution limits but struck down expenditure caps on first amendment grounds in mcconnell it upheld the key provisions of mccain feingold in both cases however opponents argued that congressional control of campaign financing was an unconstitutional infringement of the free speech rights of campaign contributors urofsky deftly steers the reader through this contentious and complex history revealing how both congress and the courts have navigated uneasily between the scylla of potential corruption and the charybdis of suppressing political speech ironically despite the court s decision upholding mccain feingold the 2004 presidential election was the most expensive in history because as urofsky notes money is the mother s milk of politics and both candidates and donors will always find ways to keep it flowing his book provides an excellent and succinct guide to the controversies and historical debates emerging from that fact from his 1956 sues triumph to the 1967 defeat president nasser of egypt dominated the arab revolution drawing on new arabic material this history casts a fresh light on nasser s era and legacy of conflict and provides an essential background to developments in the contemporary arab world annual report 2004 report for the year ended 31st march 2004 the decades long resilience of middle eastern regimes meant that few anticipated the 2011 arab spring but from the seemingly rapid leadership turnovers in tunisia and egypt to the protracted stalemates in yemen and syria there remains a common outcome ongoing control of the ruling regimes while some analysts and media outlets rush to look for democratic breakthroughs autocratic continuity not wide ranging political change remains the hallmark of the region s upheaval contrasting egypt and syria joshua stacher examines how executive power is structured in each country to show how these preexisting power configurations shaped the uprisings and in turn the outcomes presidential power in egypt was centralized even as mubarak was forced to relinquish the presidency military generals from the regime were charged with leading the transition the course of the syrian uprising reveals a key difference the decentralized character of syrian politics only time will tell if asad will survive in office but for now the regime continues to unify around him while debates about election timetables new laws and the constitution have come about in egypt bloody street confrontations continue to define syrian politics the differences in authoritarian rule could not be more stark political structures elite alliances state institutions and governing practices are seldom swept away entirely even following successful revolutions so it is vital to examine the various contexts for regime survival elections protests and political struggles will continue to define the region in the upcoming years examining the lead up to the egyptian and syrian uprisings helps us unlock the complexity behind the protests and transitions without this understanding we lack a roadmap to make sense of the middle east s most important political moment in decades when basher al asad became president of syria in june 2000 he had a tough act to follow a quiet unassuming ophthalmologist trained in britain young asad was successor to his dynamic wily father hafiz who had consolidated power in his ethnically diverse and politically restive state through personal charisma brute force and political balancing acts now some years after basher s succession and with mounting international pressure for political and economical reform his handling of the issues facing syria raises serious questions for the future stability of the middle east this is the first major work on basher al asad it assesses the durability of hafiz s legacy including the influence of the old power brokers the effectiveness of basher s attempts to move away from his father s shadow and prospects for reform above all it evaluates basher s continuing hold on power following syria s humiliating retreat from lebanon in spring 2005 an estimated 3 of the global the zoo immediately develop and implement animal care training programs to ensure that people who are directly responsible for the well being of its animal collection are adequately prepared and competent the report commends a zoo initiated strategic planning process as a positive step but recommends it contain a more detailed comprehensive strategy of how it will meet short term goals and
