financial topics with the author's proven learning system gitman's learning system makes it easy for students to understand and fully appreciate the key concepts, tools, and techniques needed for astute financial decision making in today's competitive business arena. The text's organization conceptually links a firm's actions to its value as determined in the securities markets. Each major decision area is presented in terms of both risk and return factors and their potential impact on the owner's wealth as reflected by share value with a reliable and consistent framework. The text defines learning goals at the start of each chapter and incorporates a diverse group of pedagogical aids while using real world examples and exercises to foster students' comprehension of both theory and practice. Introduction to Corporate Finance, Second Edition, continues to be a landmark in Canadian corporate finance. Written from the ground up by internationally recognized researchers Laurence Booth (University of Toronto) and W. Sean Cleary (Queen's University), the text is built around a unique framework that recognizes that finance rests upon three distinct legs: economics, accounting, and law. The text enables instructors to provide their students with a solid foundation in the theory and application of corporate finance, but with extensive coverage of new areas of finance that are important to Canadians. The state of the financial world and the global financial crisis has dominated world affairs with everyone wanting to know what happened, why, where do we go from here. Introduction to Corporate Finance, Second Edition, addresses these questions with clear, easy-to-understand discussion and analysis suitable for introductory finance students. In addition, each chapter includes a new lesson to be learned, a feature that illustrates an important concept.
